DA SERIES POCKET BAG FILTERS

Our **DA Series** Pocket Bag range of medium and high efficiency synthetic bag filters features our PVC-free, thermally bonded media and unique manufacturing techniques to create the highest quality products in terms of performance, efficiency and cost effectiveness.

The taper stitched pockets are self-supporting to maintain stability and provide maximum use of the entire filtration area with minimal resistance to airflow under constant or variable air volume conditions.

All filters are non-toxic allowing safe and easy disposal.

- Available in grades from G3 to F8/9
- Low initial pressure drop
- Up to 99% arrestance
- Oeko-Tex standard 100

When ordering please state the High (mm) Width (mm) and Depth (mm)
