DA SERIES PLEATED PANELS

DA Series Pleated Panel filters offer improved energy efficiency over standard panel filters due to the precision V pleat design which provides an extended surface area for a higher dust holding capacity and low initial resistance.

Manufactured using non-woven synthetic media, securely laminated on to a wire mesh for enhanced rigidity, these cost effective filters are ideal in hospitals, catering and food preparation areas where glass media maybe unacceptable.

- Available in grades from G4 to F9
- Energy Efficient
- High dust holding capacity
- Ideal for hospitals and catering
- Fully disposable
