DA SERIES SYNTHETIC MEDIA (BLUE & WHITE)

Our **DA Series** synthetic filter media is produced to oeko-tex Standard 100 using the latest thermo bonding techniques and is completely free of all known toxins, including PVC, allowing for safe and easy disposal.

High initial arrestance and maximum dust holding capacity is achieved through the progressive density structure which ensures optimum mechanical strength while resisting higher temperatures and moisture fluctuations.

- Filter class G4
- Face Velocity 1.5 m/s
- Initial Pressure Drop (Pa) 117
- Initial Pressure Drop (Pa) 250
- Initial arrestance (%) 85
- Average arrestance (%) 87
