

DP SERIES FILTER BAGS

The **DP Series** Filter Bags are designed to provide effective filtration for a variety of applications using numerous filter media, sewn or welded to suit. Filter bags are ideal for dealing with coarse grade particulates at high flow rates or in situations whereby the solids loading is particularly high as a pre-filter.

- Available in Polypropylene, Polyester & Nylon Monofilament
- Nominal micron ratings from 1 to 150um (high efficiency available on request)
- Available in Size 1 (420mm) and Size 2 (810mm)
- Supports higher flux rates 12m³/hr (S1) and 25m³/hr (S2)
- Comes with a GAF Style PP or Metallic support ring
- Maximum operating temp 90 degrees (PP) 135 degrees (PE) 135 degrees (NM)

When ordering please state the Size (S1/S2) Micron Rating (1 to 150um) Material (PP/PE/NM)
Ringtype (PP/Metallic)
